Jamshedpur, Jharkhand

SUMMARY

Computer Science (CS) sophomore at Manipal Institute of Technology (MIT Manipal) with a 9.13 CGPA and hands-on experience designing, building, and shipping production-grade full-stack and backend systems. Proficient in the Software Development Life Cycle (SDLC), RESTful Application Programming Interface (API) design, Object-Oriented Programming (OOP), relational databases, and Data Structures & Algorithms (DSA). Delivered two client-deployed applications used in live business and institutional environments. Seeking a Software Development Engineer (SDE) / Software Engineering (SWE) internship to build scalable, high-impact products.

EDUCATION

Manipal Institute of Technology (MIT Manipal) – Udupi

Aug 2024 – Aug 2028 (Expected)

Bachelor of Technology (B.Tech.), Computer Science and Engineering (CSE)

CGPA: 9.13 / 10

- Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)
- Ranked **238 out of 1.5 lakh** candidates nationwide in the Manipal Entrance Test (MET 2024)
- Management Committee Member: IECSE, IEEE, ACM, ISTE, ChipMIT, Chords & Co.
- **1st place**, ResQircuits at Tech Tatva '25 (competitive technical problem-solving); Organising Committee, Revels '26

Carmel Junior College – Jamshedpur

Graduated Jan 2024

High School, Pure Science (ICSE / ISC Boards)

- **100%** ISC Computer Science, **98%** Mathematics, **96%** ISC Std XII; Science Stream Topper; selected top 5/150 for national robotics competition at **IIT Delhi**

PROJECTS

Invigilation Scheduling System | *Backend Engineering, API Development*

github.com/.../IECSEinvigilationBackend

- Architected and deployed a **production-grade RESTful API** backend using **Node.js** and **Express.js (ExpressJS)** with a **SQL** relational database hosted on **Supabase**; system serves **100+ faculty** at the School of Computer Engineering, MIT Manipal
- Eliminated **~70% of manual scheduling overhead** by replacing a spreadsheet-based workflow with a structured, automated platform handling **20+ concurrent exam sessions per semester**; optimised database schema for performance and scalability
- Engineered a custom **JSON Web Token (JWT)** authentication system with end-to-end encryption and **Role-Based Access Control (RBAC)**; validated **15+ REST API endpoints** via systematic **Postman** test suites; owned full **DevOps** deployment pipeline

OTP Forwarding Application | *Full-Stack Development, Cross-Platform, Mobile*

Production: Vitrans Logistics

- Designed and shipped a **production cross-platform application** for Vitrans Logistics using **Kotlin** (Android SMS interception), **JavaScript** (middleware layer), and **React** (web dashboard / frontend)
- Applied **Natural Language Processing (NLP)** pattern-matching techniques to classify SMS senders and extract structured entities from unstructured text in real time; architected a configurable multi-rule engine for evolving business logic
- Developed device-specific native modules in **Android Studio** and **Xcode**; application is actively deployed and processing live data in a production logistics environment

IdeaScape Platform | *Full-Stack Development, Open Source, Software as a Service (SaaS)*

ideascape-two.vercel.app

- Built and deployed a high-performance **React** web application with **Search Engine Optimisation (SEO)**, lazy loading, and efficient **Scalable Vector Graphics (SVG)** rendering; serving as **Lead Developer** at IdeaScape Labs – an open-source **Software as a Service (SaaS)** organisation – driving architecture, code reviews, and cross-team collaboration

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript (JS), C, C++, Kotlin, SQL, Rust, XML
- **Frameworks & Libraries:** React, React Native, Node.js, Express.js (ExpressJS), TensorFlow, OpenCV, RESTful APIs
- **Tools & Platforms:** Git, GitHub, Linux / Unix, Amazon Web Services (AWS), Postman, Android Studio, Xcode, Supabase, Visual Studio Code (VS Code)
- **Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design, Software Development Life Cycle (SDLC), Role-Based Access Control (RBAC), JSON Web Token (JWT), API Design & Integration, Agile, CI/CD (Continuous Integration / Continuous Deployment), Natural Language Processing (NLP), DevOps
